

2020 Pharmacy Benefit Drug List Changes

Starting January 1, 2020, some prescription drugs may:

- Move to a higher or lower drug tier
- Be added or removed from the drug list
- Have a new special requirement

Below is a list of drugs in alpha order that will have one of these changes made. If you have a keyboard, you can search for a drug name by using the Control and F keys, or go to Edit in the drop-down menu and select Find/Search. Type in the word or phrase you are looking for and click on Search.

What you need to know:

- Talk with your doctor if any of these changes affect drugs you're currently using.
- Coverage for new drugs added to your plan will begin when your plan renews or starts on or after January 1, 2020.
- If your drug has been removed from coverage, ask your doctor about your options. Often, a covered generic or brand alternative may be available.
- If your drug has moved to a higher drug tier (e.g. tier 03 to tier 04), ask your doctor if a lower-cost alternative might be right for you.
- Your out-of-pocket costs may be less for drugs that move to a lower drug tier (e.g. tier 02 to tier 01).
- If your drug has a new special requirement, your doctor may need to submit a request to us before you may receive coverage.
- Call the Customer Service number on your Member ID card if you have any questions.

Pharmacy Benefit Drug List Changes – Effective on or after January 1, 2020
